Drop-Off Recycling

The Department of Solid Waste Management operates a Drop-Off Recycling Program and the primary goal is to conserve natural resources and to reduce energy consumption by recycling selected materials. Items eligible for recycling are aluminum cans, steel cans, glass food and beverage containers, plastic containers #1-#7, cardboard, junk mail, paper, magazines, and newspapers. For more details see our recycling guidelines page.

There are numerous recycling drop-off site locations throughout Escambia County. The recycling containers at each drop off site are checked daily, Monday through Saturday. Full collection containers are returned to the Perdido Landfill Recycled Material Processing Facility (RMPF) to be emptied. The recyclables are sorted and prepared for brokers and end users to be made into products using post consumer content, thus completing the recycling loop. This is why it is important to buy recycled products.

Please join our recycling program and be an active part of the Escambia County Integrated Solid Waste Management System.
